

**Product Name :**  
CIP Self-Priming Pump

**Product Code :**  
KGLOB10101004

**Description :**

CIP Self-Priming Pump

**Technical Specification :**

The ZXBL series pumps are specifically designed to handle fluid materials containing a portion of the gas. These pumps are used in a wide range of applications in food, chemical, pharmaceutical and similar applications.

Especially in the (CIP) in-situ cleaning system as a return pump.

Material:

All fluid parts, pump casing, pump cover and impeller are made of AISI316L stainless steel. The motor shroud is made of AISI304 stainless steel and is made of EPDM ethylene-propylene rubber.

Over-liquid part material: AISI316L stainless steel or AISI304

Other parts material: AISI304 stainless steel

Polishing the outer surface: spurting matt

Inner surface: polished

Liquid sealing material: EPDM ethylene propylene rubber, silicone rubber
