Product Name: Hydraulic Car Washing Ramp **Product Code:** KGLOB10265001

Description:

Hydraulic Car Washing Ramp

Technical Specification:

Type Lifting Capacity(kg) Maximum Rise(m) Min Lift height (Minimum) **Number of Stopping Positions** Max Lift height (Maximum) Maximum Load(kg) **Product Type** Number of Guide Posts Design Type Compressor Type AMC/After Sales Service available AMC/After Sales Service

Installation Provided Warranty Locking System Color

Material

Double Cylinder Hydraulic Lift

4000 5-10 1ft 2-4 4.75ft 4000 lift 2 Post

scissor 230 Yes Provided Yes 12 months

> Manual Lock red

Stainless Steel

Capacity
Motor
Lifting Time
Hydraulic car washing lift.

4 ton and 8 ton 2.0/3.0 hp 45 Seconds

autone has been successful in making and supplying grade one quality car washing lifts which way apart from the conventional single post lift

the single post lift uses 105 litre oil, the single post lift requires 5hp compressor and above all it needs a strong concrete foundation for installation, which makes the single post lift very very costly and difficult to install and dismantle.

apart from this autoone has developed hydraulic scissor lift for washing which doesn't require any foundation and the lift works with single phase supply without a compressor with just 10 litre of hydraulic oil.

the lift comes with all safety features and other system to do the operation very smoothly and efficiently. it is much much cheaper in terms of price and maintenance.
