

Product Name :
 Portable Low Rise Lift for Car

Product Code :
 KGLOB10237001

Description :

Portable Low Rise Lift

Technical Specification :

Body Material	Stainless Steel
Usage/Application	Servicing
Locking System	Manual Lock
Railing on Platform	Not Provided
Warranty	12 months
Height	115 mm
Material	Stainless Steel
Capacity	3 tons

Portable Low rise Lift.

This is a revolutionary vehicle lift first time in India. This is a car jack that weighs this lift when flat has a minimum height of only, this allows the user to slide the lift under any kind of vehicle even having lower wheel base. This carjack can be used on a perfectly levelled ground, which allows the user to make repairing bays anywhere in the workshop as per their convenience. This lift is actually like SEASAW when lifted from middle of the vehicle and the user can work either on front or the rear of the car at his convenience. It is made of a precision material which makes it to lift heavier load though the actual weight of the lift is only 65kg. Also, perfect special welding makes it more stronger and this feature makes it portable with the help of 3 wheels. This lift uses gear system which are made with cutting edge technology with antiskid device and locking system which make it most safest lift. Most suitable for all kinds of workshop, tyre shop, suspension jobs, Engine work,

denting work etc

All this features makes it most vesatile lift.this carjack100 can be lifted manually or with help of a Drill machine and hence makes it maintenance lift.
