

Product Name : Car Diagnostics Scanner	Product Code : KGLOB10262003
--	--

Description :

Car Diagnostics Scanner

Technical Specification :

Operating System	Linux
Memory	16M
CF Card	512M
Main Unit Voltage	DC12V / 24V
Power	9W
Printer	Thermal mini-printer
Display Screen	240X320 LCD with touch screen and back lit Component
Ambient Temperature	0 to 50 Degree C
Relative Humidity	Less than 90%

A truly accurate and reliable G- SCAN scan tool you can trust Touch Screen and Keypad User-friendly design operating on both intuitive touch-screen and familiar key strokes. Dual CPU Equipped with 2 CPUs working together to maximize the processing speed CAN Enabled Onboard Latest CAN-bus communication protocols enabled on-board. No external module required. Features Dual CPU for greater performance Your time should not be wasted for start-up and software loading. G-scan is designed to provide fast boot up, quick response and high speed performance by adopting a dual CPU system, which guarantees your readiness for prompt and timely service to your customers.
