

Product Name : Hydraulic Lift	Product Code : KGLOB10267002
---	--

Description :

Hydraulic Lift

Technical Specification :

Capacity	4000 kg
Min Height	117 mm
Motor	220v/380v, 50Hz/60Hz, 1Ph/3Ph
Max Lifting Height	1800 mm
Overall Height	2844 mm
Overall Width	3419 mm
Width With Columns	2799 mm
Short Arm Length	712 mm - 1051 mm
Long Arm Length	922 mm - 1462 mm
Lifting Time	50s
Lowering Time	40s

Our firm is identified amongst the leading names engaged in offering an unparalleled range of Hydraulic Lift. These hydraulic lifts are widely applicable in different garments, logistics, chemical, automobile and allied industrial sectors. In addition to this, these products are acknowledged for their features such as consistent operation, safety features and durability.

Features:

- Engagement release mode: Dual point manual release
- Arm assembly: Asymmetric two-stage telescoping long arms and two-stage telescoping elbow short arms for easy access to the lifting points of short wheel base vehicles
- Sliding adapters as standard for alternative lifting points
- Safety mechanism: Automatic arm lock restraints, mechanical safety latch in each post, parachute valve under each cylinder in case of hydraulic hose fracture, relief valve to prevent overloading and synchronization cable
- Control system: Lifting operation by pressing the button on motor and manual lowering operation by pressing the lever on power unit
