

**Product Name :**  
Cooling Room

**Product Code :**  
KGLOB10121006

**Description :**

Cooling Room

**Technical Specification :**

A combination of the advantages of cold storage:

- 1, the combination of cold storage library board polyurethane foam sandwich panels, low thermal conductivity, high strength, good insulation effect.
- 2, in terms of applicability, combined refrigerator layout can be customized freely divided space, the choice of convenience.
- 3, quick installation, short construction period, high return on investment is a distinctive feature of modular cold storage.
- 4, due to the combination of cold storage library board does not affect every other cycle of cold, cold storage warehouse cooling rate from the effect of temperature limits.
- 5, due to a combination of cold storage on-site installation is conducive to future maintenance and upkeep.
- 6, a combination of good looks cold, smooth, clean, use a combination of coated steel library board easy attachment of bacteria, in line with food hygiene requirements.
- 7, using a combination of cold storage bump connection, to achieve inter-library board and the library board quickly correct connection, shorten the construction period, allowing you to see the benefits of investment in the shortest possible time.
- 8, the combination of cold storage for a variety of space, can be any size of production, the library board 150mm, refrigerated cold storage.

<b>Cube meter</b>	<b>Net length x width x height</b>	<b>Temperature range</b>
3	1.5 x 1 x 2m	-5~+5 oC
7	2 x 1.5 x 2.3m	-15~-20 oC
13	2.5 x 2.3 x 2.2m	-25~-40 oC
24	3.5 x 3 x 2.3m	
42	4.5 x 4 x 2.3m	
...	Any size will do!
