Description :

Relief High Performance Tent 48M2

Technical Specification :

The tent is a steel/or aluminium framed structure with steel/aluminium pipes used with steel/aluminium cross connectors/fittings.

The outer liner (HDPE/LDPE) is laminated woven fabric or mix of modacrylic & cotton fabric. Shade net (knitted mesh) of woven black-out polyethylene (PE). Bathtub style detached ground sheet (polyethylene).

Fabrics used for shade net, outer liner, ground sheet, and partition kit are waterproof, UV resistant, rot proof, fire retardant and durable.
