

**Product Name :**  
Relief Water Storage Tanks

**Product Code :**  
KGLOB22211023

**Description :**

Relief Water Storage Tanks

**Technical Specification :**

We have a wide array of hygienic, robust and customized Relief plastics products. Water conservation is the most cost-effective and environmentally sound way to reduce our demand for water. We manufacture plastic storage tanks that assist consumers in conserving this precious resource for storage and consumption. Water storage tanks are made of 100% food grade plastic that conforms to USFDA standards that help the water retain its original characteristic over a period of time.

Advanced technology is used to prepare the tanks in one piece so that there are no joints. This prevents leakage and increases the longevity of the tanks.

Inlet and outlet ports are located on flat surfaces which eliminate possibilities of leakage.

The tanks are available in various colours and are odour and fungus free.

Our tank lids are uniquely designed to provide air-tight protection from foreign particles like dust, insects etc. and prevent contamination by airborne bacteria and viruses.
