Under Garments

**Technical Specification :**

Undergarments are usually items which are worn beneath the clothes for hygienic reasons. It could be in different shapes and sizes, fabric and texture. It could be made out of different materials such as cotton, silk, satin, nylon, depending on the weather and style preferences.

With new age underwear making their way into the market, it has become a trend to keep up with the different styles. Be it those trendy boy-shorts, hipster shorts, thongs, G-Strings, so on and so forth have been popular among women in the current day scenario. For men, different varieties of shorts, boxers and briefs have comprised a major part of their underwear. It could be full coverage underwear or a partial coverage one depending on the style and design.

It is usually recommended that you choose a breathable fabric which keeps away the sweat and prevents irritation in general. The warmer it gets, the riskier it becomes for infections to occur in the private area. Therefore, combed cotton is one of the most recommended fabrics for underwear in general.

Choose underwear which is comfortable and does not cause irritation. Pick up the right size such that you do not have to struggle with the comfort quotient of the entire clothing.
