

Product Name :
Solar Panels

Product Code :
KGLOB22214010

Description :

Solar Panels

Technical Specification :

We are offering high quality solar panels and you get more even in very less price. Our products are best in class and performing excellently. Affordability and fast product deliveries make us stand out from others. We are the leading manufacturer and supplier that offer you excellent products in the photovoltaics field. We have offered wide assortments of such products to our clients all across the globe. Our solar panels are quite efficient and consume power generated from sunlight. These solar panels are designed by using sophisticated technology, high grade material and innovative ideas. You can rely on the leading solar panels Manufactures, Exporter & Importer.

They work on great technology as when light strikes in panels are absorbed within the semiconductor material and produce energy. This energy flows freely towards the storage device. Our solar panels ensure high performance, rigidity and robustness. They have safe packaging and work fine after installation. Our good quality products have solid construction. They ensure good output voltage.

They are applicable in so many fields including rural radio phones and exchange, railway signaling and lighting system, microwave repeater station, community TV system, battery charging, water pumping, street light, Domestic lighting systems and much more. They ensure amazing energy production even in weak lights and ensure stable performance.
