

Product Name :
Solar Chargers

Product Code :
KGLOB22214012

Description :

Solar Chargers

Technical Specification :

Solar charges has emerged and become so much popular in current trend. It uses solar energy in order to charge the batteries or supply energies to many devices. These chargers are lightweight and portable. We are the leading manufacturer and supplier of these products and our products are appreciated by our clients all across the globe due to consistent performance and durability.

We are engaged in exporting and trading premium quality solar chargers designed under the guidance of our experienced and skilled team of technicians and engineers. We are among the well known suppliers who are famous just for offering quality always. With us, you will only get functionally advanced range of solar products.

Our solar chargers boast durable standards and optimum quality. We have tested our products on various parameters and that make us capable to deliver excellent quality products. We have satisfied clients all across the globe. These chargers are configured with solar cells that trap the solar energy. They convert the solar energy into electrical energy and make it work for charging batteries and so many devices.

This is all about the new technologies and use of solar power. These chargers can be installed in public places permanently to make the most of them. These are installed in so many parks and public places and people can use them without any charges.

These small sized portable chargers are designed to charge many devices like iPods, cell phones, mobile phones and many portable audio types of equipment. They are designed in such a way that they can easily get energy from sun. These chargers employ variety of solar panels with great efficiency.
