

Product Name :
Solar Lamps

Product Code :
KGLOB22214013

Description :

Solar Lamps

Technical Specification :

The concept of solar lamps has become so much popular as they have their own utility factors. These are becoming useful in many commercial establishments and homes all across the globe day by day. They have turned line ecological and useful gadgets that serve specific purpose. Rising cost of electric energy and consumption made the introduction of solar lamps possible in current era. These lamps are also known as solar lantern.

We are the leading manufacturer and supplier of solar lamps designed with charge controller, battery, solar panels, LED lamps and many other components. Featuring unique low power consumptions, these lamps are of great use. Electricity can be operated by these lamps by using batteries and these batteries get charged through utilization of solar panels.

These solar lamps can be the best alternative of kerosene lamps. The operating cost of this lantern is low as solar energy is renewable energy which is free. It does not cause any indoor pollution as Kerosene lamps do. These are weather dependent but still they are quite efficient.

These lamps are used in rural areas and they are highly useful during emergencies like disaster or natural calamities. Nothing can be better than solar lamps while you are on adventurous trip, hiking, camping and more.

Saving electricity may make a difference and it helps save electricity in easiest way. You can find the best alternative. They are designed amazingly and you will surely love attractive look of these lamps. These products have become the main source of energy conversion. These are portable so easy to handle and carry.

It comes with a rechargeable battery and photo voltaic solar panel. Solar panels get easily charged in day time via sunlight and glow automatically during dark.
