

Product Name :
Relief Oxygen Analyzer Ultrasonic Handheld

Product Code :
KGLOB22214060

Description :

Relief Oxygen Analyzer Ultrasonic Handheld

Technical Specification :

Operational Characteristics

Hand-held oxygen analyzer for spot-check or continuous measurement of the oxygen concentration from a medical gas source.

Ultrasonic oxygen sensing technology, with permanent sensing chamber.

O₂ measurement to include the range 21 - 96 %.

O₂ resolution: 0.1 %.

O₂ accuracy: within ± 3 %.

Flow rate measurement: up to at least 10 LPM

Flow rate accuracy within ± 3 %

Flow rate resolution 0.1 LPM

Suitable for measuring gas supply with pressure up to 50 psi (344 kPa).

Self-calibration in typical conditions of use.

Response time < 30 s.

Warm-up time < 15 s.

Display visualizing O₂ concentration, flow rate, system messages and battery status.
