

Product Name :
Relief CPAP Bubble Medical New-Born

Product Code :
KGLOB22214064

Description :

Relief CPAP Bubble Medical New-Born

Technical Specification :

Continuous Positive Airway Pressure (CPAP) system for the non-invasive respiratory support of patients with spontaneous breathing
Bubble CPAP system
Suitable for normal, premature, and low birthweight neonates and infants up to 5 kg with spontaneous breathing.
Electronic CPAP pressure/flow regulated mode depends on the available equipment/configuration
System composed by a CPAP generator, a humidifier and an air/oxygen mixer (depending on the available model, the system can be composed by the above mentioned independent devices or by an electric CPAP generator with integrated air compressor and air/oxygen mixer and with separate bubble regulator and humidifier)

CPAP generator features:

- pressure range 0.5 – 9.6 cm H₂O (up to 20 cm H₂O depending on the available model)
- continuous adjustable CPAP pressure
- pressure indicator
- bubble water column with pressure overflow valve
- separate filling funnel
- water reservoir capacity 500 ml
- electronic pressure/flow regulated CPAP generator depends on available model

rail/pole clamp

Humidifier features:

external electric heating and humidifying chamber
suitable for heated and non-heated closed patient circuits
relative humidity output up to 100 %
adjustable output temperature up to 36 °C
maintain constant CPAP at outlet
overheating protection
rail/pole clamp
