**Description :**

Relief CPAP Bubble Medical New-Born

**Technical Specification :**

Continuous Positive Airway Pressure (CPAP) system for the non-invasive respiratory support of patients with spontaneous breathing  
 Bubble CPAP system  
 Suitable for normal, premature, and low birthweight neonates and infants up to 5 kg with spontaneous breathing.  
 Electronic CPAP pressure/flow regulated mode depends on the available equipment/configuration  
 System composed by a CPAP generator, a humidifier and an air/oxygen mixer (depending on the available model, the system can be composed by the above mentioned independent devices or by an electric CPAP generator with integrated air compressor and air/oxygen mixer and with separate bubble regulator and humidifier)

- CPAP generator features:
- pressure range 0.5 – 9.6 cm H<sub>2</sub>O (up to 20 cm H<sub>2</sub>O depending on the available model)
  - continuous adjustable CPAP pressure
  - pressure indicator
  - bubble water column with pressure overflow valve
  - separate filling funnel
  - water reservoir capacity 500 ml
  - electronic pressure/flow regulated CPAP generator depends on available model

---

rail/pole clamp

Humidifier features:

external electric heating and humidifying chamber  
suitable for heated and non-heated closed patient circuits  
relative humidity output up to 100 %  
adjustable output temperature up to 36 °C  
maintain constant CPAP at outlet  
overheating protection  
rail/pole clamp
