

Product Name :
Relief Cell Saver Medical w with Access

Product Code :
KGLOB22214067

Description :

Relief Cell Saver Medical w with Access

Technical Specification :

Mobile auto-transfusion unit for blood cells salvage in intra-operative and post-operative procedures, including obstetric and major surgery

Suitable for adult and paediatric patients

Trolley with handles and liquid bag holders/poles, 4 antistatic swivel castors and 2 brakes

Adjustable trolley/equipment height

Auto-transfusion features:

blood processing, cell recovery and reinfusion functions

intermittent and/or continuous flow processing and reinfusion (continuous mode depending on the available model/set-up and patient circuit)

suitable for low volume processing (70 ml bowls for blood and washing solution in intermittent mode, 25 ml blood in continuous modes)

multiple pumps (fill, wash and empty/return)

vacuum-assisted fluid collection, built-in vacuum pump

adjustable vacuum suction 0 – -250 mmHg

centrifugal blood processing and cell recovery

adjustable centrifuge speed, up to 2,400 rpm for processing (up to 5,650 rpm for fill according to model, configuration/set-up and patient circuit type)

selectable wash programs, at least quality, fast and emergency (ultra-fast) wash
wash programs range, 25 – 100 ml/min (highest limit up to 450 ml/min depending on the patient circuit type and capacity and on available equipment model and set-up)
adjustable reinfusion flow-rate, 0 – 400 ml/min (steps and limits depend on program and patient circuit type)
