

Product Name :
High Speed Straw Applicator

Product Code :
KGLOB10001007

Description :

High Speed Straw Applicator

Technical Specification :

High speed straw applicator machine is suitable for aseptic brick cartons and pouches food packaging straw application. The whole machine adopts Omron PLC control, man-machine interface touch screen operation. Air source treatment and actuator adopts Japanese SMC brand pneumatic control components using the U.S. MAC high frequency solenoid valve; motor Japanese Yaskawa high-speed servo system; system uses the world's most well-known American Nordson hot melt rotation positioning motor and pineapple head transposition Zun Blue Series hot melt adhesive machine. Product delivery can be done automatically, straw conveying crop straw, plastic products, straw paste and fault alarm processes, save a lot of manpower and resources.

overall dimension	3500x860x1500
Machine weight	300kg
Horse power	4.5KW max.
Application capacity	12000 - 16000packs/h
Feed pattern	single file
Width of carrying belt	B55
Application air pressure	0.4-0.6Mpa
Working pressure of the hot melt adhesive pump	0.28Mpa
Max. air consumption	100L/min
