

Product Name :
Glass Bottle Filling Machine (PLC)

Product Code :
KGLOB10011007

Description :

Glass Bottle Filling Machine (PLC)

Technical Specification :

The series of filling machine for carbon dioxide-free wine, beverages, spices and other liquid quantitative filling glass bottles.

- 1, high-precision: calibration capacity of 500 ml, the average error of ± 1.5 ml.
- 3, high-capacity: filling volume can be 150-750 ml between any stepless adjustment.
- 4, a wide range: to replace the bottle can be adapted to a variety of bottle-type, convenient and quick.
- 5, no broken bottles: a flexible bottle care device, not bottle height, short limit, the bottle is not in place, not broken bottle, does not damage the machine.
- 6, automatic protection: out of the bottle at the trackwheel with overload clutch protection device, an automatic shutdown alarm anomalies.
- 7, self-control level: level control Float level control valve device used to control the liquid level stability.
- 8, electric adjustment: manual or electric synchronous continuous stepless adjustment quantitative, liquid crystal digital display accurate display.
- 9, the soft-start: boot, the machine from low-speed rise to the set speed, no rigid impact, it will not break bottle injury machine.

Parameter:

Production capacity: ? 6000 bottles / hour

Number of filling heads: 18

Applicable bottle diameter: ?40-?90mm
Applicable bottle height: 120-320mm
Motor power: 2.2 kW
Dimensions: 1150 × 1085 × 1900mm
Weight: 18 head 1200kg
Filling volume: 100-1500ml
