

Product Name :
Cream Separator

Product Code :
KGLOB10041002

Description :

Cream Separator

Technical Specification :

Cream Separator is ideal equipment for producing cream in milk processing factories live stork farm, food industry. It can widely be applies separation and detergency of similar liquid with some parts changed inside the separating bowl. It can also be separate and purify milk ,oil .chemical liquid and medicine.This separator is open , remove drags manually and its disc is electrically driven. It takes cream out of milk by using high rotating centrifugal force .And considering of the proportion difference of the stuff, to heat to milk to a certain proper temperature to separate the milk into butter fat light phase) and skim milk (heavy phase)

Separating capacity (L/h)	FL (1000-5000)
Separating tank inside (mm)	?200
Separating flakes	47±2
Separating factor	4949
Separating speed (r/min)	6650
Engine power (kw)	1.5
Size (mm)	749x488x924
Weight (kg)	178
