

**Product Name :**  
Material Handling and Packaging Conveyor

**Product Code :**  
KGLOB10261017

**Description :**

Material Handling and Packaging Conveyor

**Technical Specification :**

Belt Width 10-20 inch  
 Material Stainless Steel  
 Operating Speed 1-2 m/s  
 Automation Grade Semi-Automatic  
 Length 10-20 feet  
 Material Handling Capacity 50-100 kg per feet

Some fascinating applications like Material Handling and Packaging Conveyor by Siddhi Vinayak Engineering incorporate Pallets, Chemical Drums, Medical Devices, Bottles and Pharmaceutical items. Programmed implements are utilized when high volume marking is required. A photograph eye recognizes the item as it descends the transport line and triggers the use of the name at the correct time. Self-loader gadgets are utilized when the administrator puts the item and triggers the unit with a foot switch to apply the mark. Once the item is expelled, the cycle is rehashed. Print and apply instruments are utilized when you have an extensive assortment of items, or putting away every tape of name is excessively muddled is required or when just little clusters are run.
