

Product Name :
Conveyor Machine

Product Code :
KGLOB10261020

Description :

Conveyor Machine

Technical Specification :

Length 1-10 feet
Material Stainless Steel
Capacity (kg per feet) 50 to 100
Belt Material Rubber
Surface Polished

Conveyor machines by Siddhi Vinayak Engineering are gadgets to handle a wide range of names. They used to dispense, apply, or print and append stickers on to the bundles. The capacity is to take out labels from their sponsorship to make them prepared for use, though the mark instruments print and connect labels to the bundles. Right now, both programmed and manual name containers are accessible available. The manual sort is ideal for little specialty units or for light-obligation methods. It is worked by hand. To work manual allocators, you ought to drag a liner around the platter, and that will bring about the name to peel off of its establishment.
