

Product Name :
Packing Belt Conveyor System

Product Code :
KGLOB10261021

Description :

Packing Belt Conveyor System

Technical Specification :

Length 1-10 feet
Capacity 1-50 kg per feet, 50-100 kg per feet
Material Stainless Steel
Belt Material Rubber
Operating Speed 1-2 m/s

Packing Belt Conveyor System by Siddhi Vinayak Engineering is a machine used to apply, or print and apply names to bundles. Mark implements are utilized to name items or bundled media and can be manual, semi-mechanized, programmed, print and apply and RFID instruments. The gadget supplies a mark that has been in part peeled from the webbing. Mark instruments are weight delicate naming hardware intended for delivery tending to, item recognizable proof, stock control, valuing and information gathering. These tools are easy to work, simple to keep up and strong. Mark machines are not just intended for the utilization of names to single bundles, yet for the use of names in high volume transport frameworks where a great many names must be connected.
