

Product Name :
Sleeve Inserting And Sleeve Shrinking Machine

Product Code :
KGLOB10261024

Description :

Sleeve Inserting And Sleeve Shrinking Machine

Technical Specification :

Output Per Hour Up to 300 BPM
Direction Left To Right , As per requirement
Label material PVC, PET, OPS
Electrical rating 1.5KW-2KW
Voltage AC 380 V
phase 3- phase

Fortunately, understanding these kinds of instruments like Engineering is extremely straightforward; the critical step is to comprehend its innovation and why this innovation has made different organizations effective. Mark implements are manual, self-loader or programmed machines used to put pre-printed self-paced names on numerous sorts of items. As it were, it is utilized to quicken the technique for applying marks. That is the means by which association can spare a considerable measure of time and assets. By utilizing these tools, they will have the capacity to diminish their costs, increment their benefit and their effectiveness.
