Product Name: Hot Ink Rollers

Product Code: KGLOB10271077

Description:

Hot Ink Rollers

Technical Specification:

Roller Length 0-100 mm

Roller Surface Ink Roll
Usage/Application Printing Industry
Roller Work Nature Inking Roller
Packaging Carton

The ink in the hot ink roller is solid at room temperature and does not smudge. It is non-toxic, gives sharp impressions and contains solvent free ink and therefore there are no hazards possible as in the conventional ink. They are used in high-speed code date marking equipment in a wide variety of industries such as food industry, Pharmaceuticals, dairy, frozen food etc. They are made in sizes to fit all models of hot ink roller machines (such as Markem® or Norwood®).

Specifications:

- PP,PE,PET,PVC material
- Coding temperature
- High temperature 140~180
- Middle temperature 120~150

- Low temperature 90~130
- Height(mm): 12, 16, 32, 36, 40, 48, 60
- Outer Diameter(mm): 32, 36, 40, 48
- Inner Diameter(mm): 11, 12
- Colours available Red, Green, Blue, Black, Yellow, White
